

Prof. Dr. Peter Verburg

Professor Environmental Spatial Analysis
Vrije Universiteit Amsterdam (VU)

Role in LAMASUS:

Leads Work Package 6 –
High resolution spatial land system and behavioural
models

Biography

Peter Verburg is professor Environmental Spatial Analysis and leads the Environmental Geography group that is part of the Institute for Environmental Studies, Vrije Universiteit Amsterdam. Peter has established a leading position in the field of land use analysis and modelling. He has developed and applied a wide range of methods to analyze spatial patterns of land use at scales from local to global.
