

**LAMASUS**  
Land Management for Sustainability

## Dr. Raja Chakir

Senior Researcher

National Research Institute for Agriculture, Food and Environment (INRAE)

Role in LAMASUS:

Leads Work Package 4 –

Development of ex-post econometric models for assessing land use management drivers

### Biography

Raja Chakir is a senior researcher at the French National Research Institute for Agriculture, Food and Environment (INRAE), specializes in the econometric analysis of land use changes and their environmental impacts, focusing mainly on adaptation to climate change. She holds a degree in Statistics Engineering from the Institut National de Statistique et d'Economie Appliquée (INSEA) in Morocco and a PhD in economics from the Toulouse School of Economics. She has contributed to several European and French research projects.
