

## Ronny Lauerwald, PhD

Senior Researcher  
National Research Institute for Agriculture, Food and  
Environment (INRAE)

### Role in LAMASUS:

Leads Work Package 5 –  
Improved understanding of environmental and  
economic land use management impacts

### Biography

Ronny Lauerwald is a senior scientist at Université Paris-Saclay and INRAE. His research interests include the biogeochemical cycles of carbon, nutrients and greenhouse gases as well as the interplay between land use, climate change and freshwater resources. His work targets regional to global scales, with a methodological toolset ranging from statistical upscaling to development and application of land surface models.
